Document Title	GV30CEU Firmware Release Notes
Version	1.3.21
Date	2026-07-10
Status	Release
Document Control ID	TRACGV30CEURNR01A03V21

General Notes

Queclink offers this information as a service to its customers, to support application and engineering efforts that use the products designed by Queclink. The information provided is based upon requirements specifically provided to Queclink by the customers. Queclink has not undertaken any independent search for additional relevant information, including any information that may be in the customer's possession. Furthermore, system validation of this product designed by Queclink within a larger electronic system remains the responsibility of the customer or the customer's system integrator. All specifications supplied herein are subject to change.

1 Preamble

This Release Note introduces GV30CEU firmware version **GV30CEUR01A03V21M128** and briefly describes the benefits over preceding release. Also you can find difference compared with preceding release.

Queclink Confidential

2 Current Release

2.1 GV30CEUR01A03V21M128

2.1.1 @Track Protocol Support

GV30CEU firmware **GV30CEUR01A03V21M128** supports @Track air interface protocol version 3.06. For detailed information about the protocol, please refer to the document **GV30CEU@Track_Air_Interface_Protocol_v0306.**

2.1.2 New Features

The following table lists new features compared with the preceding firmware release, version **GV30CEUR01A02V16M128**.

Item	Brief Description
1	Added type 21 to parameter <Alarm Type> in the message +RESP:GTBAA.
2	Added type 3 to parameter <ID List Type> in the command AT+GTIDA.
3	Added parameters <Key Fob Detection Mode> and <Detection Timeout> to the command AT+GTBAS.
4	Added Bit 55/56/67 to the parameter <Input ID Mask> in the command AT+GTUDF.
5	Added type 27 to the parameter <Accessory Type> in the command AT+GTBAS.
6	Added Bit2 to parameter <Position Append Mask> in the command AT+GTCFG.
7	Added parameter <PDP Type> to AT+GTBSI command to support IPV6 feature.
8	Added bit2 <MCC/MNC>, bit3 <LAC/Cell ID> and bit4 <Timestamp> to <+RSP Expansion Mask> and <+EVT Expansion Mask> in the AT+GTHRM command.
9	Added the parameter <Mode> to RTO-0 in the the command AT+GTRTO.
10	Added the parameter <GNSS First on Time> to the command AT+GTCFG.
11	Added the command AT+GTETI.

2.1.3 Improved Features

The following table lists features or parameters that have been changed or improved compared with preceding firmware release, version **GV30CEUR01A02V16M128** .

Item	Brief Description
1	Fixed an issue where the send time in the power-on report became 2020 after a DOG or RTO reboot.
2	Fixed an issue where the CSQ RSSI/RSRP values in ERI messages were inconsistent with serial port query results for China Unicom and China Telecom SIM cards when <Network Mode> was set to 1.
3	Updated the QMS protocol version to 0507.
4	Fixed an issue where +RESP:GTDOS message was not reported when the parameter <Invert Output State> in the AT+GTCFG command was switched from 1 to 0.
5	Fixed an issue where the converted acceleration values in +RESP:GTCRD did not reach 1312 after an impact trigger when the CRA thresholds were set to 160,160,160.
6	Fixed an issue where data in +RESP:GTCRD did not match the expected configuration.
7	Optimized the parameter save functionality.
8	Modified the range of parameter <ID Validity Time> in the command AT+GTIDA from 15 - 600(s) to 0 | 15 - 600(s).
9	Fixed an issue where a DOG reboot could be triggered when any one of the independent SRI, MSI or ETI servers became unreachable.
10	Fixed the issue of excessive external voltage jump.
11	Supported sending AT+GTDBG command in the QMS channel.
12	Fixed an issue where the device would not report +RESP:GTVGF when it was stationary if <Voltage Idle Vehicle Event> was set to 1 and the voltage was not satisfied.
13	Fixed an issue where the positioning accuracy in the reported message was 1 after sending <get password gnss> via SMS when device positioning failed.
14	Optimized the voltage detection logic of AT+GTVVS.
15	Fixed an issue where over-discharged battery could not be charged when the parameter <Power Mode> in the AT+GTCFG command was configured to 1.
16	Modified the default port of HTTPS to 443.

3 Release History

3.1 GV30CEUR01A02V16M128

3.1.1 @Track Protocol Support

GV30CEU firmware **GV30CEUR01A02V16M128** supports @Track air interface protocol version 2.03. For detailed information about the protocol, please refer to the document **GV30CEU@Track_Air_Interface_Protocol_v0203.**

3.1.2 New Features

The following table lists new features compared with the preceding firmware release, version **GV30CEUR01A01V22M128**.

Item	Brief Description
1	Added functionality to prevent brute-force password attacks.
2	Added mode 0/1/4 to the parameter <GNSS Working Mode> in the command AT+GTCFG.
3	Added AT+GTMSI command.
4	Added the parameter <HBM Trigger Interval> to the command AT+GTHBM.
5	Added Accessory Type 16 and Accessory Model 1 to the command AT+GTBAS to support WKF300MON.
6	Added the new SMS diagnostic command “get queclink bas mac”.
7	Added type 25 to parameter <Accessory Type> and model 0 to parameter <Accessory Model> in the command AT+GTBAS.
8	Added type 17 to parameter <Accessory Type> in the command AT+GTBAS.
9	Added type 23 to parameter <Accessory Type> and model 0 to parameter <Accessory Model> in the command AT+GTBAS.
10	Added type 19 to parameter <Accessory Type> in the command AT+GTBAS.
11	Added type 26 to parameter <Accessory Type> and model 0 to parameter <Accessory Model> in the command AT+GTBAS.
12	Added type 24 to parameter <Accessory Type> in the command AT+GTBAS.
13	Added parameter <CRA Debounce Time> to the AT+GTCRA command.

Queclink Confidential

14	Added the parameter <Connect Mask> to the command AT+GTMQT to support Cumulocity MQTT broker server.

3.1.3 Improved Features

The following table lists features or parameters that have been changed or improved compared with preceding firmware release, version **GV30CEUR01A01V22M128**.

Item	Brief Description
1	Fixed an issue where the format of the +RESP:GTGSS HEX message was incorrect.
2	Fixed an issue where the parameter <Backup Battery Voltage> in the GTINF message was reported incorrectly after the device was plugged in with a fully charged battery.
3	Fixed an issue where the AT+GTCMD command was not forward compatible.

3.2 GV30CEUR01A01V22M128

3.2.1 @Track Protocol Support

GV30CEU firmware **GV30CEUR01A01V22M128** supports @Track air interface protocol version 1.00. For detailed information about the protocol, please refer to the document **GV30CEU@Track_Air_Interface_Protocol_v0100.**

This is the initial firmware release of GV30CEU
